## Preface

This book explores in depth the meaning of retrograde planets in astrology, symbols of a particular inner dynamic that leaves its mark on our path of evolution. When a planet is retrograde, its apparent movement as seen from Earth seems to go backwards. Symbolically, this is not a malfunction, but a change in the direction of the light of consciousness: from the outside to the inside. Instead of expressing itself immediately in the world, the energy becomes introspective, reflective, meditative. It questions more than it affirms. It retraces its steps, revisits and reconsiders.

Here you will find interpretations of the 144 combinations formed by each retrograde planet in the 12 signs of the zodiac and the 12 astrological houses. Each combination unfolds a specific nuance, revealing areas where planetary energy turns inward, inviting us to revisit our attitudes, behaviours and past memories. Retrogradation does not block the planet's function; it makes it more intimate, more demanding, and often more profound.

To understand these configurations, it is important to bear in mind my personal view of astrology, based on the principle of synchronicity. I believe that the stars do not directly influence our destiny, but rather that there is a symbolic parallel between the celestial structure at the moment of our birth and our psyche. This approach excludes any astral causality and invites us to see astrology as a symbolic language, a mirror that allows us to better

understand our inner dynamics, our potentialities, and our shadow areas.

It is with this interpretation that I invite you to read the following pages, so that retrograde planets are no longer perceived as anomalies in a chart, but as inner doors, invitations to deepen self-awareness and reconnect with a wisdom that is more intimate and more faithful to your true nature.

## Introduction

When a planet is retrograde, its apparent movement as seen from Earth seems to go backwards. Symbolically, this is not a "malfunction", but a change in the direction of the light of consciousness: from the outside to the inside. Instead of expressing itself immediately in the world, energy becomes introspective, reflective, meditative. It questions more than it affirms. It retraces its steps, revisits, reconsiders.

Retrogradation confronts us with the inner echo of the planetary function: it is less a spontaneous act than a re-reading, less a flow towards the other than a dialogue with oneself.

When a planet is retrograde in a sign, it invites us to revisit the way we experience the energy of that sign internally. It is as if the planetary function, instead of projecting itself directly into the world, must first be experienced and understood in the intimacy of our being. The sign then becomes a field of inner experimentation, an atmosphere where awareness becomes deeper, but also slower, often requiring us to revisit familiar experiences in order to extract a more authentic lesson.

Similarly, when a retrograde planet is in a house, it illuminates the corresponding areas of life from a more internalised perspective.  r situations related to this house may seem to move forward with restraint, requiring repetition or readjustment, not because of a lack of opportunities, but because they require inner maturation.

Retrogradation then transforms the house into a space for reflection and revision, where what is experienced externally finds its true meaning through intimate experience and the gradual understanding we gain from it.

**Note:**

When a transpersonal planet is in retrograde, it does not lose its role as a vector of individual and collective transformation. It still acts within each of us, but its dynamic invites us to turn inward. Uranus, Neptune and Pluto represent forces that transcend the ego and open consciousness to broader dimensions: inner freedom, spiritual inspiration, profound regeneration. However, these forces may have been misunderstood or misused in the past, due to a lack of presence or attention. Retrogradation then reminds us of the need to 'review the copy', to revisit our behaviours and re-examine how we have integrated these energies. It pushes us to resume our evolutionary path in order to experience these forces with greater accuracy, awareness and fidelity to our true nature.

## Mercury retrograde

Mercury symbolises thought, communication and the structuring of the mind. When it is retrograde, attention turns inward**.** Thoughts do not seek to be expressed first, but to be understood. There is a time for digestion, for stepping back.

Speech becomes more hesitant, not because it is blocked, but because it begins to seek a deeper coherence than simple immediate exchange.
The synchronicity of Mercury retrogrades often brings revisions, flashbacks and repetitions into our lives: an inner re-reading that is actualised on the outside.

Retrogradation can be understood as a call to inner presence. Where direct Mercury seeks to interact with the world, retrograde Mercury invites us to observe how we think, how we dialogue with ourselves, how our mind colours our perception. It is a meditative opportunity: the Mercurian function slows down, turns around, to allow us to see it more clearly.

## Mercury retrograde in Aries

When Mercury retrograde is in the sign of Aries, the lively and spontaneous momentum of your thinking turns inward. Your intelligence retains its brilliance and speed, but it does not spring forth solely to conquer the outside world: it seeks first to explore your own intuitions. Your pioneering spirit becomes introspective. You discover that your flashes of lucidity are not just weapons for verbal jousting, but torches that illuminate your own depths.

You may feel a certain disconnect in your exchanges: your words come slowly, or do not accurately reflect the brilliance of your inner thoughts. You dialogue first with yourself, even if it means giving the other person words that seem hesitant or fragmented. However, when your words are finally expressed, they carry a rare density, nourished by invisible inner work.
With Mercury retrograde in Aries, your challenge is to tame this back-and-forth between impulse and reflection. You learn to turn your frankness inward, to dare to name your most intimate truths before launching them into the world. In this way, your words become not only authentic, but transformative.

Mercury retrograde in Aries does not cancel out spontaneous momentum, but it does put it through a stage of introspection. Instead of being a scout in the outside world, the individual becomes a pioneer of their own inner landscape, exploring new ideas first for themselves before projecting them outwards.

**Mercury retrograde in Aries in the 1st house**

Your thoughts rush forth with force, but you often take the time to dialogue internally before asserting yourself. You give the impression of restrained spontaneity, as if your words need to pass through an inner fire before bursting outwards. Your mental originality is forged in this shift, and your frankness gains depth.

**Mercury retrograde in Aries in the 2nd house**

You turn your flashes of lucidity towards the question of your values and resources. Your mind seeks to define what really matters to you. You may hesitate before talking about money or possessions, but your words, once expressed, reveal a clarity and independence that is rare in this area.

**Mercury retrograde in Aries in the 3rd house**

Your intellectual vivacity finds expression in your daily exchanges, but with Mercury retrograde, you weigh your words more carefully than you realise. Your rapid conversations are accompanied by a constant inner dialogue. You learn to listen to your thoughts before sharing them, which gives your exchanges unexpected depth.

**Mercury retrograde in Aries in the 4th house**

Your brilliant mind turns to your roots, your family history, your inner foundations. You often revisit the past through

sudden, incisive thoughts. You may reveal hidden truths in your home, but you will need to learn not to hurt others with your sharp words.

**Mercury retrograde in Aries in the 5th house**

Your mental creativity is fiery, but turned inward before it manifests itself. You engage in intense dialogue with yourself in your creative impulses, and your productions bear the mark of a spark that has matured in silence. You may surprise others with sudden bursts of authentic and original speech.

**Mercury retrograde in Aries in the 6th house**

Your quick mind focuses on organisation, daily work and health. But the retrograde pushes you to review your methods and correct your habits. You seek inner efficiency before external action, and your words in this area may seem critical, but they are always aimed at improvement.

**Mercury retrograde in Aries in the 7th house**

In your relationships, you don't just speak to convince or assert yourself: you feel the need to check your own thoughts before expressing them. Face-to- come a mirror in which your words take shape. While your words may seem hesitant, they are in fact deeply considered and open up transformative dialogues.

**Mercury retrograde in Aries in the 8th house**

Your intelligence is confronted with mysteries, hidden truths and taboos. You have the audacity of Aries to tackle these subjects, but with Mercury retrograde, you explore them first in your depths. Your words are marked by a rare intensity, capable of revealing what is usually kept secret, but they can also be destabilising if they come out too abruptly.

**Mercury retrograde in Aries in the 9th house**

Your pioneering spirit turns to the search for meaning, but you constantly question your own convictions before asserting them. You explore your beliefs in a dazzling way, while returning to them to test them internally. When you express your ideas, they carry the force of a long-proven personal truth.

**Mercury retrograde in Aries in the 10th house**

Your words become an instrument of your social destiny. You are called upon to express yourself in the world, but with Mercury retrograde, your decisions and public statements are born of a long internal dialogue. You may seem hesitant, but when you speak, your words carry the authority of deep and confident thought.

**Mercury retrograde in Aries in the 11th house**

Your brilliant mind turns to your friendships, your collective projects, your ideals. You like to provoke

debate, but Mercury retrograde pushes you to think long and hard before sharing your ideas in a group. Your words may seem disruptive, but they open up new perspectives.

### Mercury retrograde in Aries in the 12th house

Your fiery mind turns to your unconscious areas. You have flashes of insight, flashes that strike you like intimate revelations. You may hesitate to share these intuitions because they seem too raw or strange, but they carry the seed of authentic spiritual lucidity.

## Mercury retrograde in Taurus

When Mercury is retrograde in the sign of Taurus, your patient and grounded thinking turns to an even deeper inner self. You think slowly, but this slowing down becomes a real strength: it allows you to revisit your values, your certainties, your ways of reasoning. You feel the need to further verify the soundness of your ideas, to revisit your judgements, to let your thoughts and in riate, just as you would let fertile soil rest before sowing it.

You may give the impression of hesitating or ruminating at length before speaking. However, this internalisation of your mind allows you to find lasting clarity. When your words do come, they bear the mark of stability and proven truth. Mercury retrograde in Taurus invites you to rediscover what you already know, reconnect with your past experiences, and draw on your sensory memory to strengthen your thoughts.

Your challenge is not to become overly cautious, which could cause you to doubt what you already understand well. But if you accept this fruitful slowness, you will develop an inner wisdom that communicates with great quiet strength.

**Mercury retrograde in Taurus in the 1st house**

Your manner of expression is slow and measured, but with Mercury retrograde, you sometimes seem hesitant to say what you really think. You take the time to rethink your words and check that they are accurate. Your outward image is that of a calm, thoughtful person, but also one who is capable of speaking with deep conviction.

**Mercury retrograde in Taurus in the 2nd house**

Your thoughts focus on your values, your possessions, your resources. With Mercury retrograde, you often revisit your material choices, your expenses, your priorities. You learn to redefine what is truly valuable to you. Your words in this area are imbued with practical wisdom, even if you take time to assert them.

**Mercury retrograde in Taurus in the 3rd house**

Your daily exchanges take on a thoughtful and sometimes silent tone. You observe more than you speak, preferring to listen, assimilate, and come back later with clear and calm words. You like to repeat, revise, and deepen your learning. What you convey has a taste for simplicity and stability.

**Mercury retrograde in Taurus in the 4th house**

Your mind turns to your past, your home, your roots. You often revisit your memories, slowly and deeply, seeking to gain new understanding. Within the family, you may be silent, preferring to keep your thoughts to yourself, but when you do speak, your words are soothing and reassuring.

**Mercury retrograde in Taurus in the 5th house**

Your mental creativity is nourished by patient inner dialogue. You mull over your projects for a long time before bringing them to fruition. Your words in love or in your creative impulses may seem restrained, but they carry the power of your authenticity. You have a talent for creating simple and lasting forms, nourished by your inner self.

**Mercury retrograde in Taurus in the 6th house**

Your thoughts turn to your daily life, your work, and your health. With Mercury retrograde, you are inclined to review your methods, habits, and ways of managing time and tasks. Your critical mind is strong, but it is mainly deployed internally: you ask yourself many questions before making a decision. Once made, your choices are solid and lasting.

**Mercury retrograde in Taurus in the 7th house**

In your relationships, you tend to keep your thoughts to yourself before sharing them. Your partners may find your responses slow to come, but they are deeply accurate when they do arrive. You dialogue with yourself before dialoguing with others, which gives your exchanges a depth that is sometimes confusing but always sincere.

**Mercury retrograde in Taurus in the 8th house**

Your mind delves into secret areas, hidden truths, and the mysteries of life and death. You have a slow and introspective way of probing these realities, and your words on these subjects, though rare, are marked by a particular intensity. You constantly revisit your deepest thoughts, seeking to give them stable coherence.

**Mercury retrograde in Taurus in the 9th house**

Your quest for meaning is marked by slow and repeated reflection. You do not adopt a philosophy or belief lightly. You constantly revisit your convictions, seeking to verify their soundness. Your words in this area may seem cautious, but they are informed by embodied and enduring wisdom.

**Mercury retrograde in Taurus in the 10th house**

Your career and social role require you to communicate, but you never rush into anything. With Mercury retrograde, your professional choices and public

statements are carefully considered. You give the impression of being a serious person whose words carry weight because they are based on long internal reflection.

### Mercury retrograde in Taurus in the 11th house

Your ideas are geared towards collective projects, but you take the time to review your choices and weigh up the consequences of your commitments. You engage in dialogue with yourself before participating in a debate. Your slowness may surprise others in a group, but when you do speak, your words provide clear and reassuring direction.

### Mercury retrograde in Taurus in the 12th house

Your thoughts turn to the depths of your unconscious. You tend to meditate at length, ruminating on silent thoughts, sometimes doubting your ability to express them. Yet your inner intuitions, when they find words, prove powerful and illuminating. You have a talent for giving shape to inner truths that seemed inaccessible.

## Mercury retrograde in Gemini

When Mercury retrograde in its sign of Gemini, its energy seems to turn inward. Your thinking becomes more introspective, sometimes hesitant, and you feel the need to revisit your ideas rather than constantly producing new ones. You may doubt your own words, seeking to correct, rephrase or withhold them. Communication, usually fluid and spontaneous, becomes more complex:

misunderstandings, misinterpretations and delays in exchanges multiply. This retrograde movement invites you to slow down, listen more than you speak, and think before you respond.

This is a time when your curiosity turns inward: you revisit your memories, re-evaluate what you have learned, and question your certainties. This introspection can be valuable, as it sharpens your discernment. Where direct Mercury in Gemini seeks to explore a thousand paths, its retrograde motion pushes you to sort, prioritise and recognise what is essential in the flood of information. You would do well to use this period to write, analyse, reread, revise or complete what has been left unfinished.

**Mercury retrograde in Gemini in the 1st house**

You give the impression of hesitating in the way you express yourself. Your words sometimes seem to betray your thoughts, and you constantly seek to correct yourself. This retrograde invites you to cultivate patience in communication, so that your expression is aligned with how you truly feel.

**Mercury retrograde in Gemini in the 2nd house**

You are reconsidering the way you talk about your values and material needs. Errors of judgement in your choices or spending may appear, prompting you to think more carefully about the real value of things.

**Mercury retrograde in Gemini in the 3rd house**

**Mercury retrograde in Gemini in the 4th house**

Your memories, roots and family conversations come to the fore. You feel the need to revisit old stories, tidy up your archives or clear up misunderstandings with your loved ones.

**Mercury retrograde in Gemini in the 5th house**

Your words in the emotional or creative realm may lack fluidity. You are re-examining your ways of seducing, playing, and creating. You will benefit from slowing down and seeking a more authentic form of expression.

**Mercury retrograde in Gemini in the 6th house**

misinterpreting others. This retrograde requires you to express yourself clearly and revisit your agreements or commitments.

Your beliefs, studies or travel plans need to be re-evaluated. Confusion in your philosophical or spiritual discourse prompts you to refine your understanding and clarify your thinking.

**Mercury retrograde in Gemini in the 10th house**

Communication in your public or professional life is being put to the test. Misunderstandings or delays are causing you to rethink your positions and speak more cautiously.

**Mercury retrograde in Gemini in the 11th house**

Your exchanges with friends, collective projects, or community commitments are slowing down. You need to clarify your intentions and avoid rumours or misunderstandings.

### Mercury retrograde in Gemini in the 12th house

Your thinking becomes more internalised, but also more confused. You may get lost in abstract reasoning or feel a need for silence. This is a good time for introspection, meditation and personal writing.

## Mercury retrograde in Cancer

When Mercury is retrograde in the sign of Cancer, your thinking, usually fuelled by memory, intuition and sensitivity, tends to turn to the past with even greater intensity. You may be overwhelmed by memories, revisit old emotions, or delve into inner dialogues related to your personal and family history. Conversations become tinged with nostalgia or ambiguity, as it is sometimes difficult for you to clearly distinguish between what you feel and what is actually being said.

This period invites you to slow down your emotional impulses in communication. You may tend to withdraw into yourself, keep your thoughts to yourself, or feel misunderstood when you try to express them. Misunderstandings often arise from emotional projection: you hear what you hope or fear, rather than what is actually being said. Mercury retrograde in Cancer therefore encourages you to revisit your memories with discernment, to clarify your feelings before sharing them, and to free yourself from old mental patterns linked to the past.

**Mercury retrograde in Cancer in the 1st house**

You find it difficult to express your thoughts clearly because they are emotionally charged. You may doubt how you present yourself to others, hesitating between silence and the need to share. This retrograde invites you to speak from a place of sincerity and calm.

**Mercury retrograde in Cancer in the 2nd house**

Your values and material needs are influenced by memories or emotional attachments. You may reconsider your relationship with security, your possessions and your resources. It is a good idea to check your judgements to avoid nostalgia clouding your judgement.

**Mercury retrograde in Cancer in the 3rd house**

Everyday exchanges and communication with those around you are marked by misunderstandings. You revisit old conversations or reconnect with people from the past. This period invites you to clarify your words and listen more attentively.

**Mercury retrograde in Cancer in the 4th house**

You delve back into your family history, your roots, or your childhood memories. Old discussions may resurface within the home. This is a favourable time to reorganise your archives, revisit your family stories, and bring clarity to your origins.

**Mercury retrograde in Cancer in the 5th house**

Your creativity and emotional expression are tinged with nostalgia. You may hesitate to share your feelings or seek to rediscover a form of past innocence. This time invites you to revisit your creative and romantic impulses in order to give them a new authenticity.

**Mercury retrograde in Cancer in the 6th house**

In your professional or daily life, communication may be confusing, especially with your colleagues. Memory lapses or forgetfulness may occur. This retrograde encourages you to review your methods, slow down and organise your thoughts better.

**Mercury retrograde in Cancer in the 7th house**

In your close relationships, you may experience misunderstandings related to projecting your emotions onto what others say. You are encouraged to take a step back, calmly rephrase, and distinguish between what you feel and what is actually being said.

**Mercury retrograde in Cancer in the 8th house**

You revisit intimate discussions, secrets or deep memories. Your words may be heavy with emotion and cause misunderstandings if they are not clarified. This retrograde encourages you to explore your inner truths with caution and sincerity.

**Mercury retrograde in Cancer in the 9th house**

Your beliefs and philosophical ideas are revisited from an emotional perspective. You may reread old texts, re-examine your convictions, or revisit travel or study plans. It is time to refine your vision by sorting through the legacy of the past and your true aspirations.

**Mercury retrograde in Cancer in the 10th house**

Communication in your public or professional life may lack clarity. Your words may be interpreted through the prism of emotion. This is a time to be cautious in your official statements and to revisit your career choices with discernment.

**Mercury retrograde in Cancer in the 11th house**

Your group projects or friendships may be marked by misunderstandings. You revisit old friendships or resume projects that have been left on hold. It is important to clarify your intentions and not to project your emotions onto the expectations of others.

**Mercury retrograde in Cancer in the 12th house**

Your thoughts become particularly focused on your inner self and unconscious memories. You may be overwhelmed by memories or disturbing dreams. This is a good time for introspection, personal writing or meditation to bring order to your deepest emotions.

## Mercury retrograde in Leo

When Mercury is retrograde in Leo, your thinking, which is usually direct, bright and confident, is challenged by a form of inner questioning. You may feel doubtful about how you express your ideas or fear that your words will not have the impact you hope for. Your natural eloquence may seem less fluid, and your usually solid certainties may be tinged with hesitation.

This retrograde invites you to review how you use your creative intelligence and verbal charisma. You may be tempted to speak with too much confidence, but in reality, inner work is needed to regain accuracy in expressing your thoughts. This is a good time to revisit your speeches, rework your writing or communication projects, and ask yourself whether your desire for recognition and s sometimes mask an inner fragility.

You are thus invited to move from brilliant, external expression to more authentic and profound speech. By agreeing to slow down and re-examine your motivations, you can transform this period into a moment of intellectual maturation that will subsequently give even more strength to your voice and clarity of mind.

## Mercury retrograde in Leo in the 1st house

You may feel less confident when speaking and question your usual way of presenting yourself to others. This period encourages you to rediscover a more humble sincerity in the expression of your thoughts.

**Mercury retrograde in Leo in the 2nd house**

Your judgements about your resources and values may lack clarity. You may overestimate or underestimate your means, influenced by a desire to shine. It is advisable to calmly reassess your material priorities and your real needs.

**Mercury retrograde in Leo in the 3rd house**

Daily exchanges and communication with those around you are marked by misunderstandings, sometimes due to an overly assertive or authoritarian tone. Revisiting your way of communicating will allow you to regain a more balanced approach to listening and sharing.

**Mercury retrograde in Leo in the 4th house**

You may relive old family arguments or find it difficult to express your thoughts in the privacy of your home. This period is favourable for re-examining your relationship with your roots, home and family heritage in order to bring clarity.

**Mercury retrograde in Leo in the 5th house**

Your creative and romantic impulses are tinged with hesitation. You may fear that your talents will not be recognised or that your emotional declarations will be misunderstood. This time invites you to redefine how you express your heart and imagination.

**Mercury retrograde in Leo in the 6th house**

In your professional or daily life, misunderstandings may arise, especially if you impose your ideas too firmly. It is best to review your working methods, refine your organisation and adopt a more flexible attitude in your exchanges.

**Mercury retrograde in Leo in the 7th house**

Partnerships may suffer from misunderstandings related to communication. You may tend to want to impose your point of view forcefully, which leads to tension. This period invites you to review your ways of engaging in dialogue and cooperating.

**Mercury retrograde in Leo in the 8th house**

You may revisit deep or intimate discussions that touch on trust, sharing, or secrets. It is important not to try to control through words, but rather to open yourself up to more vulnerable and sincere communication.

**Mercury retrograde in Leo in the 9th house**

Your beliefs, philosophical or spiritual ideas, as well as your travel or study plans, may be called into question. You are invited to refine your vision and revisit your discourse, so that it is carried by depth rather than mere brilliance.

### Mercury retrograde in Leo in the 10th house

In your public life, your speeches or professional communications may be poorly received if they seem too self-centred. This retrograde encourages you to review the way you address an audience, to inspire without dominating.

### Mercury retrograde in Leo in the 11th house

Your collective projects and friendships may be marred by misunderstandings, especially if you try to impose your ideas too assertively. This is a good time to re-examine your role in a group and think about how to communicate in a more unifying way.

### Mercury retrograde in Leo in the 12th house

You may feel a need for silence and introspection, as your thoughts seem less clear. Memories related to your past expressions may resurface. This is a good time to work on your inner vulnerabilities and make your words more authentic.

## Mercury retrograde in Virgo

When Mercury is retrograde in the sign of Virgo, it slows down and intensifies your analytical mind. You are invited to revisit your working methods, examine your thinking habits and correct what may have seemed to work until now but lacked accuracy or efficiency. This retrograde can cause moments of doubt, a tendency to be overly critical

or to seek perfection to the point of paralysing yourself in action. It also reveals memories, forgotten details, or past mistakes that resurface to be rectified. This movement pushes you to clarify your mental processes, simplify your reasoning, and learn to let go of the constant need to control or verify every element. This is a period when you are asked to develop more intellectual flexibility, to integrate patience and to understand that efficiency comes not only from rigour, but also from fluidity and trust in the natural course of events.

**Mercury retrograde in Virgo in the 1st house**

You are revisiting the way you express your intelligence and critical thinking in your direct relationships. You may doubt your clarity or logic, but this helps you adjust the way you present yourself and communicate.

**Mercury retrograde in Virgo in the 2nd house**

Your thoughts revolve around your resources, security and material priorities. You are led to rethink the value you place on certain things and to correct an overly rigid or accounting-based view of your assets.

**Mercury retrograde in Virgo in the 3rd house**

Daily communication, your relationships with loved ones, and your learning are being scrutinised. You may encounter misunderstandings, but also opportunities to deepen your knowledge or reconnect with studies you have put aside.

**Mercury retrograde in Virgo in the 4th house**

You return to your roots, your family history, or your domestic habits. Old memories or discussions resurface, prompting you to clarify or reorganise your inner foundations.

**Mercury retrograde in Virgo in the 5th house**

Your creative and emotional expression may seem slowed down. You are invited to revisit your artistic projects, take a step back from your spontaneous impulses, and seek a more authentic form of expression.

**Mercury retrograde in Virgo in the 6th house**

Your daily organisation, health, and relationship to work need to be reviewed. You may notice some problems with your methods or routines, but this will allow you to establish a more suitable discipline.

**Mercury retrograde in Virgo in the 7th house**

In your relationships, old discussions are coming up again or misunderstandings need to be cleared up. You are encouraged to review the way you communicate and collaborate, seeking more clarity and less criticism.

## Venus retrograde

A retrograde planet can be seen as a reminder to go back because the presence of what the planet represents in us has been lacking. With Venus, the retrograde invites you to revisit the way you love, attract, and connect with others.

If Venus is retrograde in your chart, emotional and relational dynamics do not always follow the direct or spontaneous path usually associated with this planet. The experience of love, desire, and seduction then takes on a more internal, almost introspective form. You may sometimes feel out of step with the usual codes of attraction or romantic life, as if part of you needs to withdraw to examine more deeply what is going on behind your emotional impulses.

This inner movement can lead to reliving certain relationship situations in the form of repeats, repetitions or flashbacks. These experiences are not there to trap you in a cycle, but to allow you to recognise what, in your expectations or ways of loving, still lacks awareness and presence. Venus retrograde seeks to slow down the instinctive impulse to seduce in order to deepen the true meaning of your bonds and attractions.

You may feel more strongly the importance of loving sincerely rather than just seeking to please others, of attracting what truly responds to your heart rather than what flatters your ego. This retrograde motion leads you

to question the value you place on love, harmony and beauty, but also the value you place on yourself.

In this sense, Venus retrograde does not weaken the force of attraction, it makes it more selective, more conscious, more profound. It invites you not to remain on the surface of things but to explore your true emotional needs and to recognise that your relationships are subtle mirrors of your own relationship with love and tenderness.

## Venus retrograde in Aries

You are invited to revisit the way you express desire and attraction: have you been too impulsive, too quick to give in to enthusiasm without deepening the connection? ## Mars retrograde

When we consider Mars in its usual dynamic, it represents our strength of action, our combativeness and our way of moving forward in life. It is the energy that drives us to act, to take on challenges and to assert our will.

If Mars is retrograde in your natal chart, this energy does not disappear, but it takes on a particular movement: instead of projecting itself spontaneously outwards, it tends to turn inwards.

This does not mean that you lack courage or determination, but that the way you use this force often requires more awareness and perspective. Mars retrograde confronts you with the need to revisit the way you act, to examine your deep motivations and to clarify the reasons for your struggles.

Often, this reveals that in your past, action was taken without sufficient presence, perhaps in haste, anger, or with goals that were too external to yourself. With Mars retrograde, life invites you to slow down, examine your impulses, revisit certain choices, or learn to transform your impulses into actions aligned with your conscience.

You may sometimes feel hesitant before acting, a sense of being held back or blocked, but this is not a handicap: it is a call to cultivate more appropriate and grounded action. Where others move quickly forward, you are led to retrace your steps, to revisit a project, a struggle or an assertion of yourself, until your inner presence is truly established.

Mars retrograde therefore teaches you to transform the raw energy of action into a more subtle, conscious and adjusted force. It is no longer just a question of 'winning' or 'conquering', but of understanding why you are acting and taking meaningful action. ## Saturn retrograde

Saturn's retrograde motion does not change the planet's fundamental nature, but it does alter the way we experience and integrate its energy. Saturn remains a force of maturity, responsibility and inner lucidity, but when it goes retrograde, it invites us to engage in even more intimate and internalised work.

Instead of directly confronting external constraints, limitations or responsibilities, we are led to examine in depth our personal relationship with these same realities. It is a kind of return to ourselves to understand where we have lacked presence in the way we set our boundaries, assume our responsibilities or learn lessons from the trials we have encountered.

Saturn retrograde can signal that our relationship with discipline, renunciation, patience, or rigour has been experienced in a way that is too external, too conditioned by what society or those around us expect of us. Retrogradation reminds us that true grounding does not come from these external expectations, but from an inner silence where we redefine for ourselves what is right, useful, and necessary for us.

In this position, Saturn asks us to revisit our past choices, re-evaluate our limits, and sometimes correct certain attitudes inherited from conditioning. We feel slowed down, as if held back in our ambitions or projects, but this slowdown is not a punishment: it is an invitation to better understand the value of time, discernment and simplicity.

Thus, Saturn retrograde becomes an even more demanding inner master, who does not allow us to escape into ready-made answers or constraints imposed by others. It confronts us with our own responsibility to be, with the need to build our foundations not to fit an external framework, but to be aligned with what we know deep down to be right for us.

## Uranus retrograde

When Uranus is retrograde, the force of emancipation it symbolises does not disappear, but turns more inward. Rather than acting directly in the outside world through visible ruptures or sudden changes, this energy seeks to work deeply on your most intimate conditioning. It invites you to revisit your behaviours, instinctive reactions and past choices to see where you may have given in to ease, habit or compromise instead of truly following your aspiration for freedom.

Retrograde Uranus highlights the part of yourself that has not yet dared to break with certain dependencies, attachments or attitudes inherited from the past. This is not about provoking spectacular revolutions on the outside, but about preparing for a more subtle and lasting inner liberation. Uranian energy pushes you to examine your relationship with authenticity: how far are you willing to go to be true to who you really are? Where do you continue to play a role that no longer suits you?

Retrogradation offers you a time of review and clarification. It requires you to take a deeper look at your own conditioning in order to free yourself from what is silently limiting your expansion. It is a process of introspection that leads you to redefine your reference points, not to follow a collective movement or external fashion, but to align your path to freedom with your inner truth.

## Pluto retrograde

If Pluto is retrograde in your chart, its action does not disappear but changes register. Rather than manifesting itself through obvious external circumstances, its energy turns inward. The processes of transformation, already intense with Pluto, then take on a more intimate, subtle colouring, sometimes less visible to others but deeply effective on a psychic and spiritual level.

Retrograde Pluto invites you to revisit your attachments, fears and inner resistance. The power struggles or control issues you may be experiencing externally are actually rooted in buried dynamics, inherited from the past or embedded in the unconscious. It is less a matter of seeking to transform the world around you than of daring to explore the dark areas of your own being, confronting your defence mechanisms and your most stubborn obsessions.

This retrogression often brings to light old memories or conditioning that continue to affect you without your knowledge. It requires you to 'revisit' your relationship with power, your desire for control, and your fears of loss or abandonment. External situations, far from being mere obstacles, become mirrors: they reflect the conflicts or fears you carry within you.

Whereas direct Pluto leads you into crises or visible questioning, retrograde Pluto confronts you with a more inner alchemy. It is about purifying your deepest motivations, recognising the parts of yourself that you try to hide, and reconciling yourself with these areas of

darkness. This process requires patience and honesty with yourself, but it paves the way for a more authentic and lasting rebirth.

Thus, retrograde Pluto acts as a force of inner stripping away. It does not ask you to transform the world on the surface, but to transform your invisible roots. It is a silent but essential task, for it allows your power to express itself no longer through struggle or resistance, but through a rediscovered integrity and a truer presence to yourself and others.

## Conclusion

As you have explored the various retrograde planets in signs and houses, you have seen how their symbolic language opens up a subtle and fertile field of introspection. Far from representing a weakness or an obstacle, retrogradation invites us to slow down, reconsider, and reconnect with the inner dimensions of existence. Each planet, by "stepping back", reveals a valuable key to better understanding your psychological dynamics, your questions and your resistances.

The study of retrogrades is therefore not limited to technical interpretation: it offers a path to awareness. It reminds us that true transformation comes from inner dialogue, from the ability to revisit our history and welcome what needs to be illuminated.

May these pages accompany you like a benevolent mirror, a call to listen more closely to your inner world and to honour the living movement of your being. For if the sky offers us its symbols, it is so that each of us may discover a path to knowledge and liberation.

## Retrograde Planets:

*Carefully revisiting our inner dynamics*

When a planet is retrograde in an astrological chart, its apparent movement seems to go backwards. This phenomenon is not a defect or a blockage, but an invitation to turn our gaze inward. Planetary energy ceases to project itself immediately into external action and becomes introspective, revising, questioning, deepening.

In this book, Jérôme Zenastral explores the meaning of retrograde planets through 144 detailed combinations: the 12 signs of the zodiac and the 12 astrological houses. Each interpretation sheds light on a particular dimension of the inner work that retrogradation invites us to undertake: revisiting our impulses, re-examining our attitudes, and rediscovering a deeper coherence with ourselves.

True to his vision of astrology based on synchronicity, Jérôme Zenastral reminds us that there is no direct influence from the stars, but rather a symbolic language that reflects our inner dynamics. Retrograde planets then become valuable keys to introspection, not obstacles, but intimate passages to a broader and more authentic awareness of oneself.
